

INTERNATIONAL RULES & GUIDELINES CHANGES AND MODIFICATIONS FOR 2011 - 2012

Human Participants:

- The term, human subjects, has been changed to human participants.

Vertebrate Animals:

- Zebrafish embryos are not considered vertebrate animals until 7 days (168 hours) post fertilization

Potentially Hazardous Biological Agents:

- Laboratory studies culturing KPC (Klebsiella pneumonia) must be conducted in a BSL-2 laboratory in Registered Research Institution with documented IBC review and approval
- Self-sampling of capillary blood for analysis can be conducted in a home setting (e.g. glucometer reading)
