

The Display and Safety Training Video given here was created for the 2021-2022 Science Fair. The following items are **differences** for the 2022-2023 Fair:

- (1) The D&S Checklist (referred to at 2:36 in the video) has been updated to “Rev H” (not Rev F). As mentioned in the training video, please print it and refer to it frequently.
- (2) The shortcut rejection codes (seen at 12:36 in the video) have been modified to go with the current D&S Checklist. One of the biggest changes is that “acknowledgements” are okay to have this year (in the pdf, report, etc.) so there is no code ##8.
- (3) If the pdf presentation is simply a photo of the board (seen at 12:48-13:15 in the video), we are allowing that this year as long as you are able to read what is there.
