

## **SCIENCE FAIR SUCCESS YOUR BEST WORK**

**VIRTUAL PRESENTATIONS/WORKSHOPS IN OCTOBER AND NOVEMBER**

(Check website for schedule/details. Registration is required to receive zoom link)

In March 2021, Detroit will host the 64th Annual Science and Engineering Fair at TCF Center (or via a virtual fair due to COVID-19), providing students of southeast Michigan in grades 3 to 12 an opportunity to exhibit science fair projects. This is one of the largest and longest running science fairs in the world.

The EMA has partnered with SEFMD to provide mentoring to students by top Michigan experts within the scientific fields. Members of the Operating Council, along with science fair judges, teachers and past science fair participants will discuss how to execute ideas, develop science fair projects, and how to showcase them for judging.

**This program is open to 3rd-12th grade students, parents and teachers. Attendees will have the opportunities to win prizes provided they preregister.**

**For more information (including dates and topics of seminars), or to RSVP for this free seminar, go to: <http://www.SEFMD.org/Seminar>. Alternately, contact the Science Fair Office at (248) 471-9900.**
